

As a past attendee of the Baker Gordon Symposium we are looking forward to seeing you next week.

Patients Unlimited Marketing Consultants is the firm that designed and hosts the Baker Gordon Website for the past five years. Seventeen years ago our firm made history being the first organization to host cosmetic specialists on the Internet.

We made history last year as the first Web hosting SEO firm to introduce an online solution to address the issues of on-line reputation management using unique software developed by Dr. Adam Summers, a member of your plastic surgery society.

PUMC has contributed enhancements to this software that makes it a perfect and cost-effective solution to not only protect your hard earned reputations but generate quality patients for your practice.

We invite you to join us Thursday evening, February 9th for a reception or come to booth 38 to review this solution.
